

AVARIS 2

RETROSPECT

THIS PROGRAM REQUIRES 32K EXPANSION
AND WIRED REMOTE CONTROLLER

NOTE: PROGRAM WILL NOT WORK ON EARLY
T199/4 (NOT A) COMPUTERS.

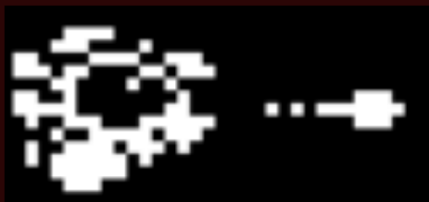

AVARIS 2

Take to the stars to battle the evil Kraal empire and restore peace to the cosmos.

To control your starship, use Joystick-1

Pushing in any direction will control the starship's movement. Pressing the red button will release your devastating laser bolt.

As you progress through the levels, your fire power will increase as well as your starship's movement speed.

AVARIS 2

Alabite Cruiser

Moves in quick, tracks & fires at player

Saucer

Moves across screen, randomly starts tracking player. Will try to ram player.

Oddman Cruiser

Similar to Alabites but a little faster and just as lethal

Morbite Cruiser

Zooms towards player, tracks & fires at player

Weaponized Saucer

The most lethal craft. Unpredictable. Fires at player

Robot

Walks through freighter firing fast laser bolts

Death Satellite

The robot's pet. Keeps the player moving by tracking. Cannot be destroyed!

AVARIS 2

When you complete a level, you will enter a space freighter. Your mission here is to shoot and kill ten Robots. They are not alone, however. They are accompanied by a Death Satellite. This object tracks the player and cannot be destroyed!

Once you either kill ten Robots or die trying, you will be back in the space stage. A new color for the scrolling ground will indicate a new level.

After level 1, all enemies will need to be shot twice to kill them. They will turn white first, then be destroyed. Your score will increase by 10 points each level you reach, up to level 9 where it stays as it is.

Good luck, pilot!
